

 **ARISTON**
The home of sustainable comfort

The right choice
for sustainable
comfort

Nimbus NET R32
Air/Water
Heat-Pumps

Ariston's most advanced heat pump range combining **top performance** with **maximum flexibility**.

The next few years will be crucial to determine the world's response to climate change. The new heat pump range comes from Ariston's willingness to continuously upgrade and advance its offer, staying always at the forefront of innovation while offering a truly effective way to help you live more sustainably.

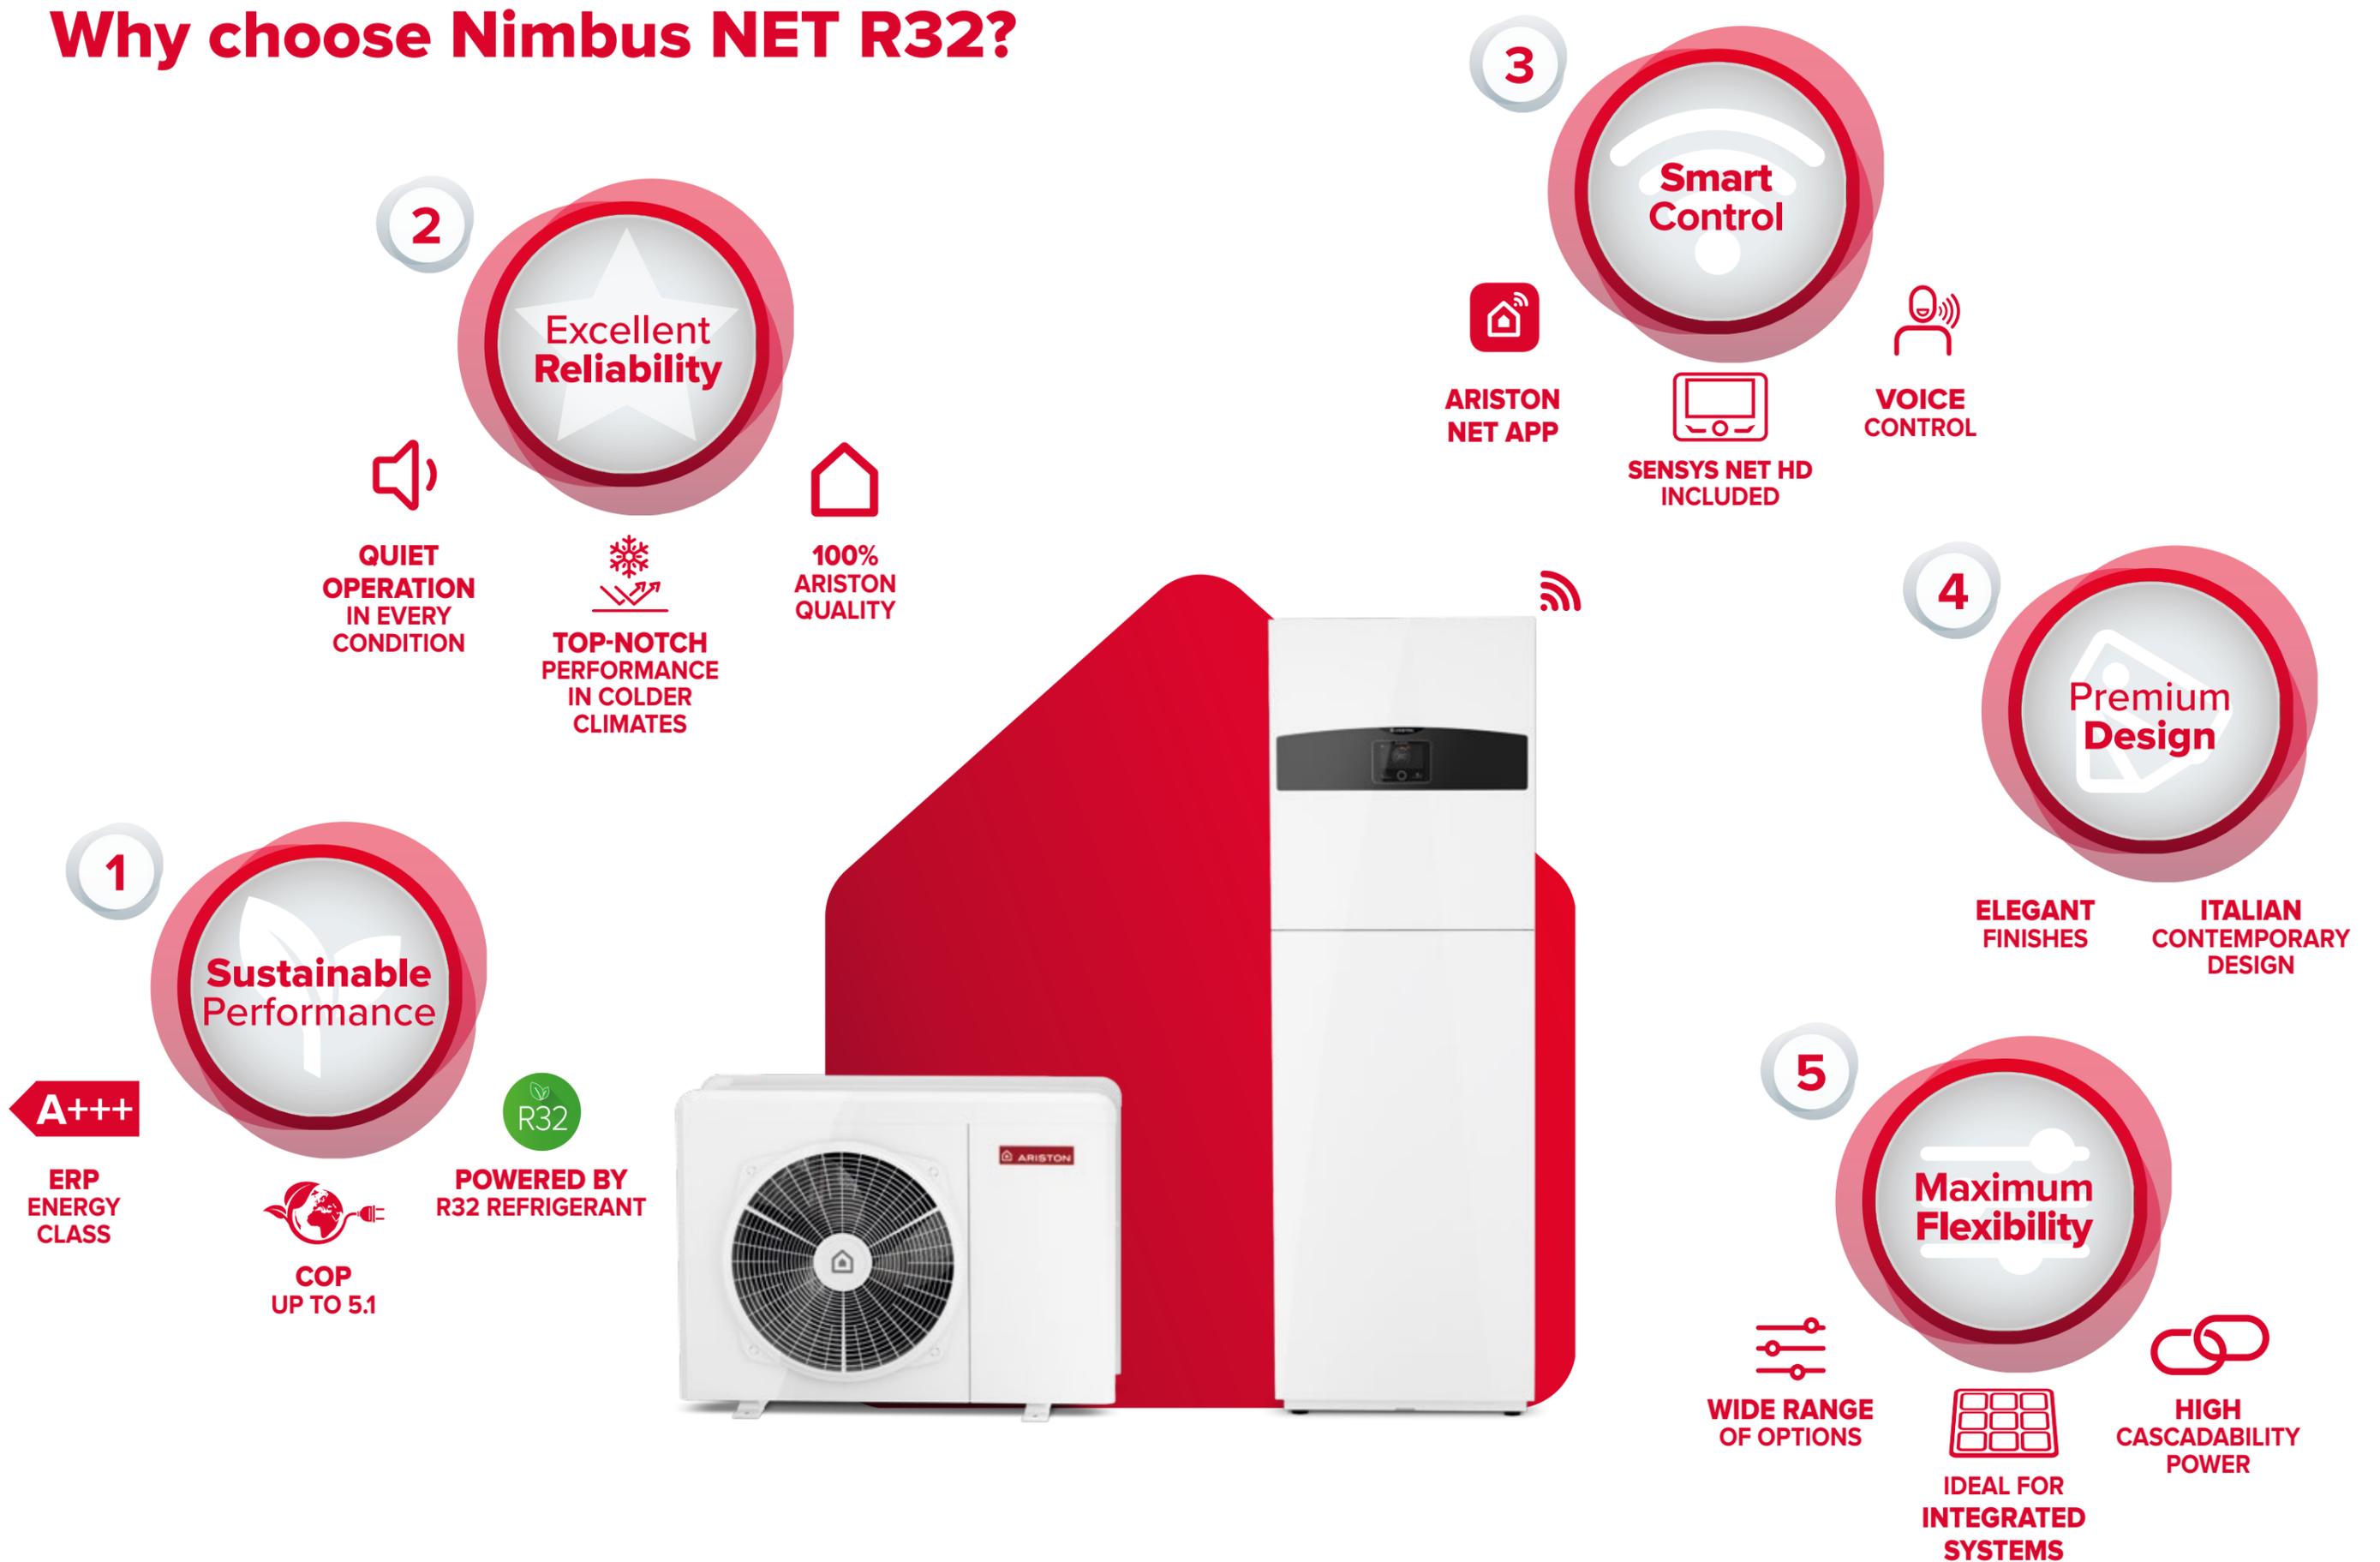

The new nimbus NET R32 provides a sleek-looking and highly-efficient solution for sustainable heating, cooling and water heating. Using the new Energy Manager 2.0 and boasting class A+++ efficiency, this R32 compatible heat pump range is fitted with advanced features and components that guarantee low-noise stable performance and maximum reliability with minimum consumption and lower environmental impact - even in challenging conditions.

That means that not only you can achieve superior comfort in the most convenient way, but you can reduce your bills and your footprint too. And with the new Sensys NET HD included in the box, managing comfort becomes easier and more intuitive than ever.

Thanks to the Ariston NET app, you can now have perfect control over your system from anywhere, save energy and receive continuous technical support direct to your smartphone*.

* Remote assistance is available through subscription to an Ariston NET after-sales service.

Why choose Nimbus NET R32?

1 Sustainable Performance

A more energy-conscious home

A total solution for heating, cooling and water heating with best-in-class energy performance and reduced environmental impact.

Top-class efficiency:

A+++

ErP rating

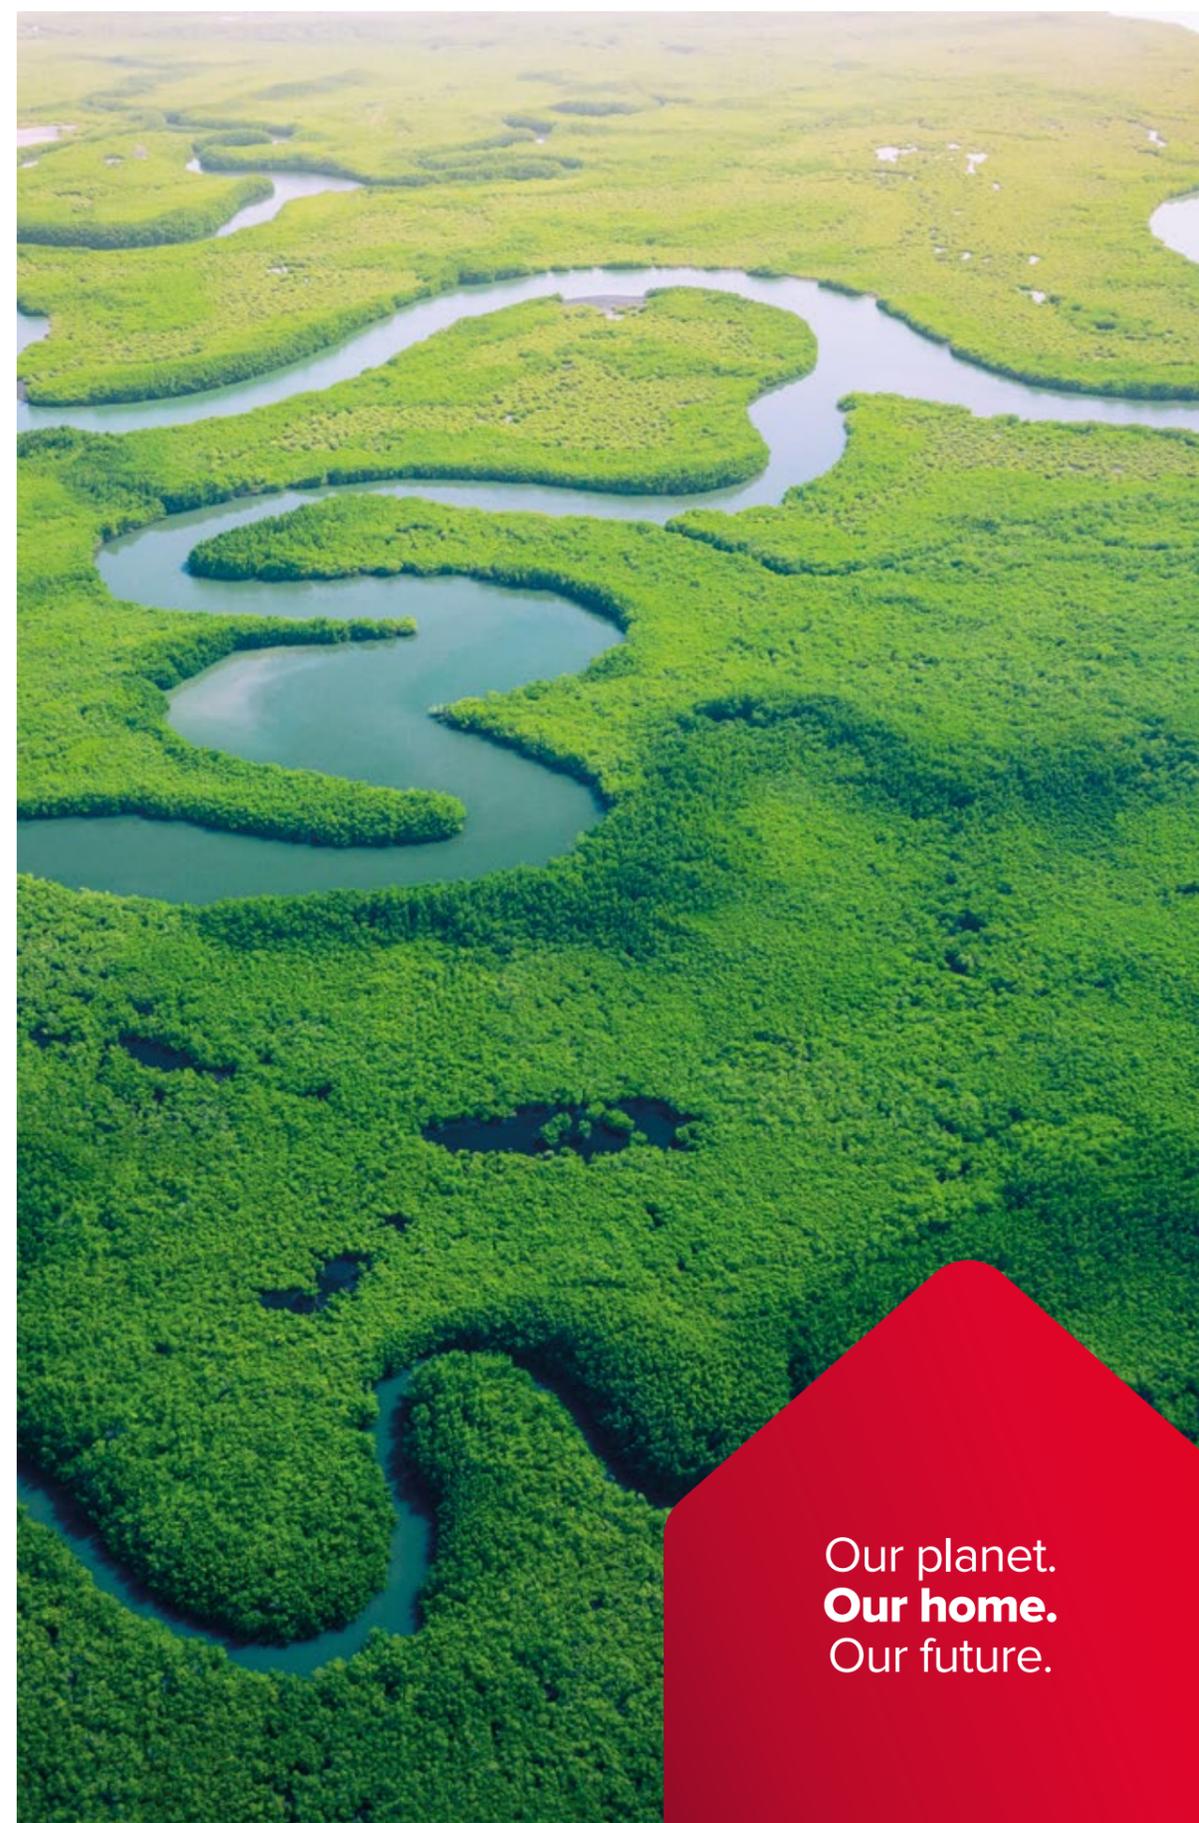

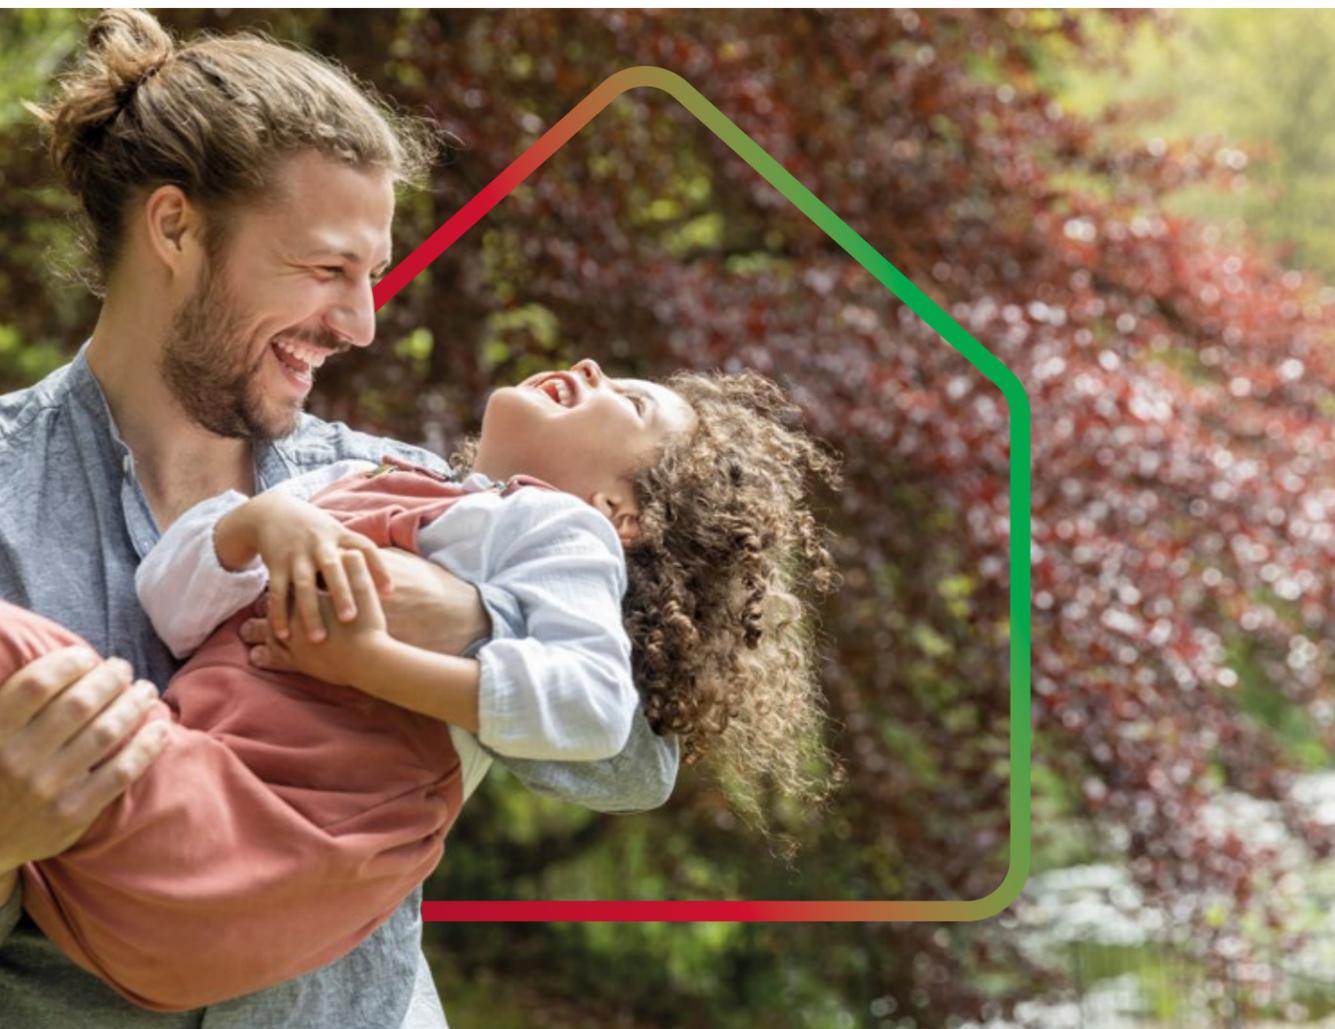

UP TO
5.1 COP

Powered by R32 refrigerant

Nimbus NET 32 heat pumps use R32 refrigerant. That means that not only do they offer top-class energy performance, but they are also an excellent option to let you achieve maximum comfort with a lower environmental impact.

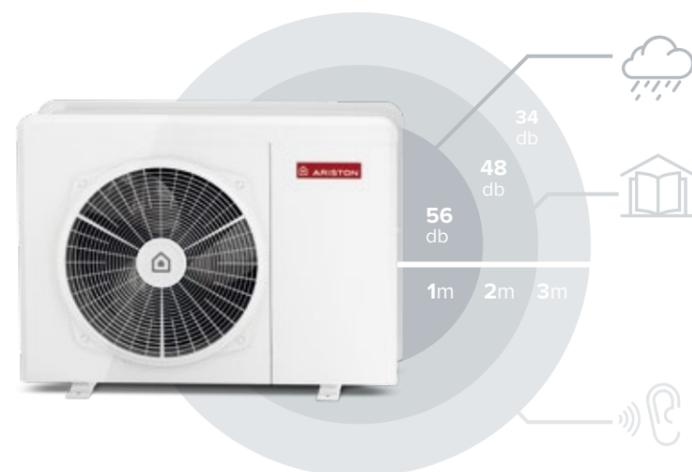

Our planet.
Our home.
Our future.

2 Excellent Reliability

Enduring quality

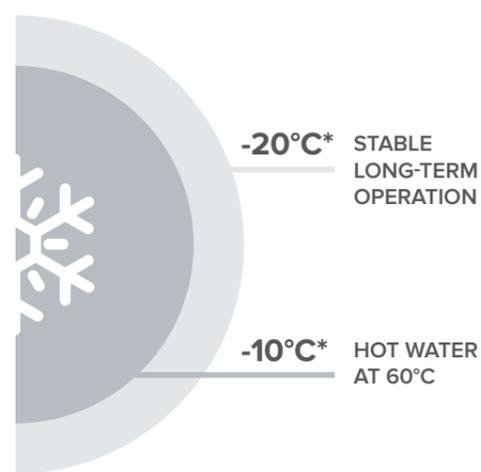

The new Nimbus NET R32 boasts state-of-the-art technology and features designed to guarantee consistent top performance, dependability and peace of mind over time even in extreme weather conditions.

QUIET OPERATION IN EVERY CONDITION

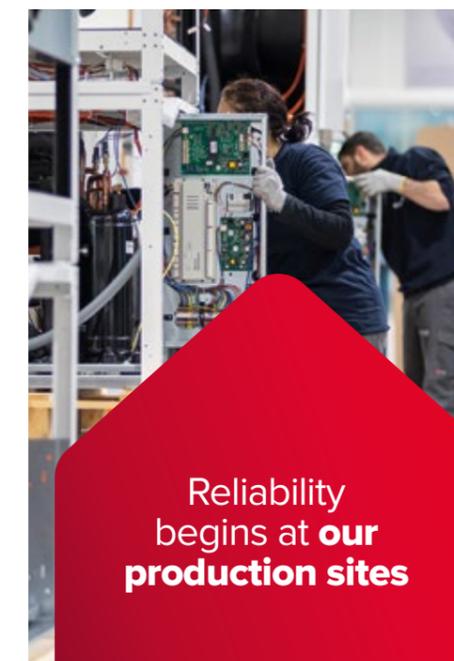

Within **1m** = **56 db** – similar to the sound of rain
Within **2m** = **48 db** – similar to the sound level in a library
Within **3m** = **34 db** – similar to a whispering sound

TOP-NOTCH PERFORMANCE ALSO IN COLDER CLIMATES

* Outdoor temperature.

The Ariston quality inside and out

Ariston is the global specialist in thermal comfort with a unique expertise and cutting-edge innovation in heating and water heating products.

By constantly exploring innovative ways to upgrade its offering as well as enhance system and product engineering, Ariston strives to deliver the highest standards of quality and ensure maximum comfort to anyone - be they a professional or an end user of its products.

World Class Manufacturing

In Ariston's world-class production hubs, excellence in industrial manufacturing is pursued through constant updates and improvements of processes, always focusing on product quality, the environment and safety.

100% made by Ariston

All system components and software are developed in-house by Ariston experts to ensure long-lasting performance, high-efficiency, and extended product life.

100% automatically checked and tested

Before leaving the plant, Nimbus NET R32 undergoes a fully automated quality, safety and efficiency testing process with instantaneous tracking and unlimited capability.

3 Smart Control

Comfort at your fingertips

Equipped with Sensys NET HD

/ Can be optionally built into the unit or mounted on a wall.

Nimbus NET R32 comes with Sensys NET HD included. Equipped with the BUS BridgeNet® protocol, this innovative system interface will become the control center of your comfort at home, allowing you to easily create a daily and weekly temperature schedule, set up different temperatures for up to six different zones within your home, and choose between different modes and special functions according to your needs and preferences. Moreover, the device can be optionally embedded into the front panel of the indoor unit or mounted on a wall.

Comfortable temperature when and where you need it

7:00 AM

The living space is heated up to 21°C, so you can wake up to a warm house.

9:00 AM

When you leave your home for the day, Sensys HD lowers the temperature of all rooms to 16°C to let you save money.

05:00 PM

The heating system heats the living space up to 21°C, so that the temperature when you come home is welcoming toasty.

10:00 PM

The temperature of the sleeping area reaches 18°C, making all the bedrooms in your home ready to let everyone enjoy a good night of quality sleep.

Ariston NET compatible

Nimbus NET R32 is equipped with smart connectivity. Setting the desired temperature, optimising consumption and receiving prompt assistance have never been easier and more comfortable. With the Ariston NET app, you can control your system functions from anywhere using a smartphone or tablet.

Not only that: with Smart Scheduling - the new AI-powered function of Ariston NET - the benefits of smart comfort become even greater. If you want, the system can learn from your habits using artificial intelligence and provide a tailor-made weekly schedule that self-adjusts and constantly updates to meet your changing needs.

4 Premium Design

Looks good anywhere

Nimbus NET R32 stands out for its elegant design created by the Italian designer Umberto Palermo. Modern, sleek and attractive, the aesthetics of the indoor and outdoor units will make the product look good both inside and outside your home.

**The perfect
complement
to any home
and furnishing.**

5 Maximum Flexibility

Endless choices

The new heat pump range offers a variety of solutions to choose from and it's ready to satisfy the most diverse needs and requirements, both when used as a single-component or as part of an integrated system.

Nimbus Compact NET R32
Split & Monobloc

Nimbus Flex NET R32
Split & Monobloc

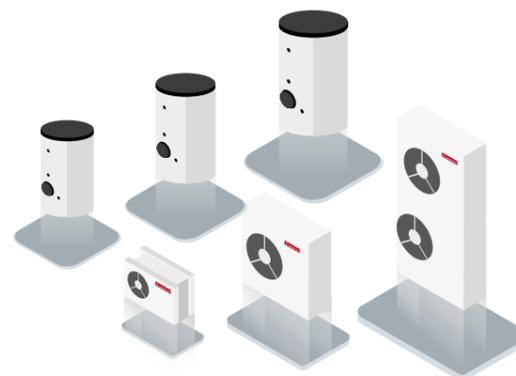

Nimbus Plus NET R32
Split & Monobloc

Nimbus Pocket M NET R32
Monobloc

DHW TANK
available in 3 capacities:
200 L, 300 L or 450 L

OUTDOOR UNIT
available in different sizes:
35, 50, 80, 120 and 150

Ready for any installation conditions and high heat load demands

With a range of powers from 3.5 kW to 15 kW when using a single outdoor unit and up to 75 kW as a cascaded system, Nimbus NET R32 is an excellent option for single family homes, collective housing and light commercial applications. The new Energy Manager 2.0 allows to link together up to 5 outdoor units in a cascaded system.

Single family houses
or terraced houses

Single outdoor unit
3.5 - 15 kW*

Collective housing
with a central heating system

Cascade system
Up to 75 kW*

Light commercial
offices, gyms
and department stores

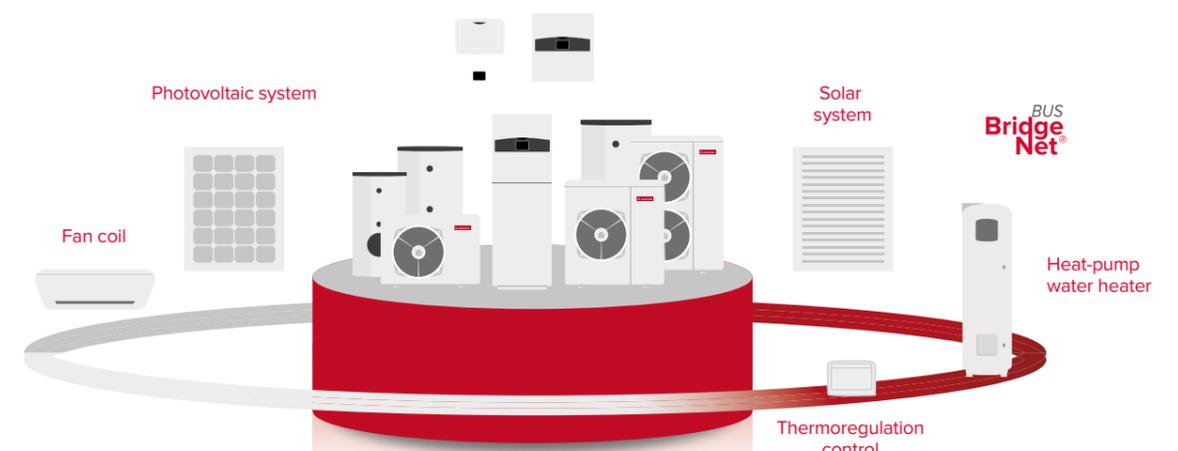

Cascadability options
2 to 5 units

* Nominal powers.

Ready to fit in an integrated system

Nimbus NET R32 can also be cleverly coupled with multiple types of external thermal systems. Intelligent communication between all system components is enabled by the Energy Manager 2.0, now featuring enhanced electronic control with more advanced functionalities, and by the Ariston's patented communication protocol BUS BridgeNet®.

The Nimbus NET R32 range: comparing technologies

Nimbus S NET R32

For the SPLIT heat pumps (Nimbus S NET R32), the refrigeration circuit is divided between external and internal unit. The refrigerant gas completes the thermodynamic cycle in the external unit and thermal exchange with system water occurs in the internal unit.

- / No risk of water freezing inside external unit
- / Less significant pressure drops
- / Reduced external heat dispersion

- 1/ Gas/air heat exchanger (evaporator) with straight fins and Blue Fin treatment
- 2/ Inverter control
- 3/ Fan
- 4/ Twin-rotary DC inverter compressor
- 5/ Integrated 12 l expansion vessel
- 6/ Additional electric heating elements pre-installed as standard
- 7/ Gas/water plate heat exchanger
- 8/ Thermic hermetic shell
- 9/ Integrated multifunctional filter with nanometer
- 10/ 3-way valve
- 11/ Class A high-efficiency modulating system circulator pump
- 12/ Active anode
- 13/ Passive anode

- 14/ Integrated 180 l cylinder
- 15/ Predisposition for additional heating accessory dedicated for DHW
- 16/ Gas connections
- 17/ Wired external sensor
- 18/ Sensys NET HD thermostat
- 19/ Light gateway

Nimbus M NET R32

For the MONOBLOC heat pumps (Nimbus M NET R32) the refrigeration circuit is hermetically sealed inside the external unit. The refrigerant gas completes the thermodynamic cycle and thermal exchange with system water occurs in the external unit.

The main advantage of this solution are:

- / Simple installation
- / Flexible installation (available in inset model and model without internal unit)
- / Floor standing model with dual temperature zone included as standard

- 1/ Gas/air heat exchanger (evaporator) with straight fins and Blue Fin treatment
- 2/ Inverter control
- 3/ Fan
- 4/ Twin-rotary DC inverter compressor
- 5/ Class A high-efficiency modulating system circulator pump
- 6/ Gas/water plate heat exchanger
- 7/ Integrated 12 l expansion vessel
- 8/ Thermic hermetic shell
- 9/ Additional electric heating elements pre-installed as standard
- 10/ Integrated multifunctional filter with nanometer
- 11/ 3-way valve
- 12/ Active anode
- 13/ Passive anode

- 14/ Integrated 180 l cylinder
- 15/ Predisposition for additional heating accessory dedicated for DHW
- 16/ Hydronic connections
- 17/ Wired external sensor
- 18/ Sensys NET HD thermostat
- 19/ Light gateway

Nimbus Compact NET R32

Sensys NET HD included

Can be optionally embedded into the front panel of the indoor unit or mounted on a wall.

- / Inverter air/water heat pump for heating, cooling and domestic hot water
- / Extremely high-efficiency even in cold climates, with additional heating elements that can be activated individually from 2 kW+2 kW (mod. 40-50-70) and 2 kW+2 kW+2 kW (mod. 90-110) for guaranteed comfort in any conditions
- / Ariston NET connectivity included as standard
- / Sensys NET HD system controller and external heat regulation sensor included as standard
- / Ultra-compact indoor unit (600x600) with integrated 180 l cylinder featuring enlarged coil and 12 l expansion vessel as standard
- / Free initial start-up

- 1 / Fan coil
- 2 / Floor Standing unit
- 3 / Outdoor unit

- 4 / Radiator
- 5 / Underfloor heating

Nimbus Flex NET R32

Split & monobloc

The ideal solution if you prefer a separate DHW tank with customizable capacity.

- / Extremely high-efficiency even in cold climates, with additional heating elements that can be activated individually from 2 kW+2 kW (mod. 40-50-70) and 2 kW+2 kW+2 kW (mod. 90-110) for guaranteed comfort in any conditions
- / Ariston NET connectivity included as standard
- / Sensys NET HD system controller and external heat regulation sensor included as standard
- / Can be combined with external DHW cylinder
- / 12 l expansion vessel as standard
- / Free initial start-up

1 / Heat pump water heater
2 / Wall Hung module
3 / Outdoor unit

4 / Radiator
5 / Underfloor heating

Nimbus Pocket M NET R32

Monobloc

It can be fully installed outdoor (light box unit and outdoor unit) with the possibility to operate in conjunction with other heating products and systems (e.g. heat pump water heater).

Light box module
Energy manager included for flexible installation options.

- / Inverter monobloc air/water heat pump for space heating and cooling
- / Extremely high-efficiency even in cold climates
- / Ariston NET connectivity included as standard
- / Sensys NET HD system controller and external heat regulation sensor included as standard
- / Light box unit, that can also be installed outdoor, enables remote positioning of all outdoor unit connections
- / Plug and Play solution: can be combined with suitable external DHW cylinder
- / Dedicated buffer storage tank and integrative 2 kW heating element that can be purchased as optional accessories

- 1 / Light Box module
- 2 / Outdoor unit
- 3 / Underfloor heating

After-sales service

First class service

Ariston service model is designed to offer efficiency and professionalism to all its customers.

Genuine Ariston spare parts

All Ariston spare parts are built and tested to guarantee the best possible quality and the reliability of your Ariston product. Using genuine Ariston spare parts and components is the only way to keep your system at its best, fulfilling legal and warranty requirements.

Maximum peace of mind

Ariston gives you the assurance of long-term product quality and safety, and in case of any potential problem it ensures that everything will be dealt with quickly and professionally.
